

## Android Developer

Technokriti Solutions LLP is looking for an Android developer responsible for the development and maintenance of applications aimed at a range of Android devices including mobile phones and tablets. Your primary focus will be development of Android applications and their integration with backend services. You will be working alongside other developers working on different apps. Therefore, a commitment to collaborative problem solving, sophisticated design, and the creation of quality products is essential.

### Responsibilities :

- Design and build applications for the Android platform
- Ensure the performance, quality, and responsiveness of applications
- Collaborate with a team to define, design, and ship new features
- Identify and correct bottlenecks and fix bugs
- Help maintain code quality, organization, and automatization
- Proficient with Java and Kotlin {depending on project requirements}
- Experience with SQLite, SQLCipher, JSON Parsing and Client/Server Web Services
- Must have built and published commercial Android mobile and tablet applications
- Experience with Android libraries
- Experience with offline storage, threading, and performance tuning

# TECHNOKRITI

SOLUTIONS LLP

- Familiarity with RESTful APIs to connect Android applications to back-end services
- Knowledge of other web technologies and UI/UX standards
- Understanding of Google's design principles and interface guidelines
- Experience with performance and memory tuning with tools {{Depending on project needs}}
- Previous experience integrating Android mobile and tablet applications to server side API
- Familiarity with cloud message APIs and push notifications
- Knack for benchmarking and optimization
- Proficient understanding of code versioning tools {{such as Git, Mercurial or SVN}}
- Familiarity with continuous integration
- Should be able to demonstrate apps that were developed and live in play store
- Experience in implementing MVC / MVVM in context of App development
