

iOS Developer

We are looking for an iOS developer responsible for the development and maintenance of applications aimed at a range of iOS devices including mobile phones and tablet computers. Your primary focus will be development of iOS applications and their integration with backend services. You will be working alongside other developers working on different apps. Therefore, a commitment to collaborative problem solving, sophisticated design, and the creation of quality products is essential.

Responsibilities

- Design and build applications for the iOS platform
- Ensure the performance, quality, and responsiveness of applications
- Collaborate with a team to define, design, and ship new features
- Identify and correct bottlenecks and fix bugs
- Help maintain code quality, organization, and automatization
- Proficient with Objective-C, Javascript, X-Code, Swift {{depending on project requirements}}, and Cocoa Touch
- Experience with SQLite, SQLCipher, JSON Parsing and Client/Server Web Services
- Must have built and published commercial iPhone and iPad applications
- Experience with iOS frameworks such as Core Data, Core Animation, etc.
- Experience with offline storage, threading, and performance tuning
- Familiarity with RESTful APIs to connect iOS applications to back-end services
- Knowledge of other web technologies and UI/UX standards

TECHNOKRITI

SOLUTIONS LLP

- Understanding of Apple's design principles and interface guidelines
- Knowledge of low-level C-based libraries is preferred
- Experience with performance and memory tuning with tools {{such as Instruments and Shark, depending on project needs}}
- Previous experience integrating iPhone and iPad applications to server side API's
- Familiarity with cloud message APIs and push notifications
- Knack for benchmarking and optimization
- Proficient understanding of code versioning tools {{such as Git, Mercurial or SVN}}
- Familiarity with continuous integration
- Should be able to demonstrate apps that were developed and live in app store
- Experience in implementing MVC / MVVM in context of App development
